Education

Kalinga Institute of Industrial Technology, Bhubaneswar

2019 – 2023

Bachelor of Technology in Computer Science

9.02 CGPA

Work Experience

Software Engineer

Jan. 2024 – Present

BOSCH Global Software and Technologies

Hyderabad, Telangana

- Implemented **REST API** integration in **React** using **Axios/Fetch with custom hooks** to consume backend endpoints and enable real-time data exchange between frontend components and server-side systems.
- Implemented automated email notification workflows using **useEffect hooks** with **setInterval-based** background tasks to schedule and trigger periodic alerts, ensuring timely and reliable communication.
- Developed a dynamic Help Page component using **controlled components**, **useState/useReducer hooks**, and **dynamic list rendering** to support add/edit/delete operations on hyperlinks with real-time UI updates.
- Developed a History component for audit-trail workflow approvals using RESTful API consumption, component-based architecture, and dynamic state management using React hooks to display user roles, IDs, and approval metadata.
- Developed a dynamic, in-place filtering engine that allows users to query complex datasets without page refreshes, significantly improving data discoverability.
- Developed a real-time cell-editing feature that synchronizes user-selected trigger dates with the backend via RESTful services, providing immediate UI feedback.
- Replaced Kafka-based synchronous request/response workflows with **REST APIs**, reducing operational complexity, improving error visibility, simplifying troubleshooting, and decreasing integration support effort by approximately 40%.
- Developed and documented 10+ REST APIs using **Swagger/OpenAPI**, accelerating consumer onboarding and reducing integration effort for downstream teams.
- Improved frontend performance by enabling client-specific field selection and reducing dependency on multiple REST API calls.
- Leveraged **GitHub Copilot** and **Gemini Code Assist** for debugging, unit testing, and code reviews accelerating implementation, defect resolution, and code quality improvements by 30%.

Project Trainee

Jan. 2022 – Apr. 2022

HighRadius Corporation

Bhubaneswar, Odisha

- Architected and deployed an end-to-end B2B FinTech invoice management web application using **React.js**, **Java Servlets**, and **MySQL**, automating Accounts Receivable workflows across 1,000+ transaction records.
- Designed an interactive financial dashboard with **React.JS** for real-time analytics and visualization of key business metrics.
- Designed an enterprise **DAO (Data Access Object)** pattern utilizing the **Java Collections Framework** and **JDBC**, optimizing data-retrieval latency by 7% for large-scale invoice datasets.
- Engineered modular **Java Servlets** to handle **concurrent HTTP requests**, enabling real-time **CRUD operations**, **multi-field search queries**, and **dynamic server-side pagination**.
- Developed an interactive, responsive user interface utilizing **React.js** and **Material-UI**, incorporating analytics dashboards with dynamic bar graphs and pie charts to visualize financial distribution metrics.
- Integrated an **AI-driven predictive service** within the UI grid, allowing financial analysts to forecast order amounts on selected invoices and reducing manual credit assessment time by 10%.

Projects

Noogle Search Engine | *React.JS, CSS, REST API*

[LINK](#)

- Designed a cutting-edge **Search engine** using **React.JS** and **REST API** for real-time search functionality to retrieve the latest results, news, photos, and videos, ensuring up-to-date information access.
- Used **CSS** for enhanced user experience with a sleek Dark Mode.

Technical Skills

Languages: Python, C, C++, JavaScript, Typescript, Java

Technologies/Frameworks: React.JS, RxJS, Reactive Forms, Material-UI, REST API, Swagger/OpenAPI, HTML5, CSS3/SCSS, Axios

Developer Tools: VS Code, Git, GitHub, GitHub Copilot, Postman, Bruno, JIRA, Antigravity

Database: SQL, MySQL

Concepts: REST API Design, Component Architecture, Agile/Scrum, Unit Testing, CI/CD

Coding Profiles: LeetCode — HackerRank — CodeChef
